ACRO Lights Fire Program;

Many of you are unaware that ACRO Lights offers spec built products for fire dozers and other fire fighting equipment. These products are sold under our special "Fire Program" started in 2004. All operators, direct employees and sub-contractors of any fire agency qualify, anywhere in the world!

Under this program you will receive a special "fire discount" on all purchases. Many products also meet our free shipping guidelines.

ACRO Lights has worked closely with several different agencies field testing specific products in order to fine tune them to your needs. As a result of this, many dozer operators already use our products realizing the benefits of quality lighting in harsh and often dangerous work areas.

To reduce overall cost of maintenance, many of our popular models used in these applications can be rebuilt helping you keep them in service for years to come. In the event of damage, simply ship the light in to our main California office and it will be repaired for cost of parts only, no labor.

Let ACRO Lights help you create a safer work environment and supply you with the best possible lighting for your equipment. Contact us directly for full details on this special program.

Please note that this program is not available through any ACRO Lights dealer. Contact ACRO Lights directly for purchasing under the "Fire Program".
